DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 and 15-41, drawn to a method of treating memory disorder comprising administering a nicotine antagonist, classified in class 514, subclass 661.
- II. Claims 14, drawn to a method of treating cognitive disorders comprising a partial nicotine agonist, classified in class 514, subclass 343.
- III. Claims 42-51, drawn to a method for improving executive function comprising administering mecamylamine, classified in class 514, subclass 661.
- IV. Claims 52-61, drawn to a method for treating attention deficit hyperactivity disorder comprising administering mecamylamine, classified in class 514, subclass 661.
- V. Claims 62-71, drawn to a method for treating bipolar disorder comprising administering mecamylamine, classified in class 514, subclass 661.

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I and III, IV-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects since the claims are drawn to a unrelated medical disorders having different etiology.

Art Unit: 1617

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions since Group I is related to administering a nicotine antagonist and Group II is related to administering a partial nicotine agonist.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Carl B. Massey, Jr. on October 29, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
